## **POF COMPONENTS**

Electronic Links International, Inc. [www.electronic-links.com](http://www.electronic-links.com) with the headquarters in the US, and Nitta [www.nitta.co.jp](http://www.nitta.co.jp) with the headquarters in Japan, have jointly agreed to cancel their existing mutual marketing agreement in which Nitta had the free, exclusive license to market the ELII patented plastic optical components in Asia. ELII is now directly marketing these components worldwide.

In addition, ELII has purchased from Nitta the necessary mold, dies, assembling tools, and electrical test equipment needed to produce these products. The amount of the transaction has not been disclosed.

Mr. Francesco Liburdi, the ELII company founder and president, stated that “this change should help to quickly respond to the market needs of the worldwide requests by presenting a centralized, single source for these products.”

ELII is in the process of adding additional sales channels for the Asian territory. For the full size of the plastic optical products offered by ELII, visit the company web site.

### **About Electronic Links International**

Electronic Links International, Inc. develops standard and custom plastic optical fiber connectors, cable assemblies and other devices.
