### Measuring Method

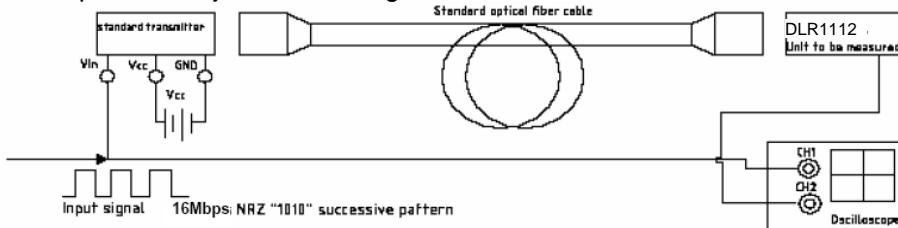

- \*1 Maximum receiver input optical power/Minimum receiver input optical power

- \*2 Current dissipation measuring method

- \*3 Pulse response and jitter measuring method

### Precautions for Using Method

1. Connect a by-pass capacitor (0.1uF) close to the DLR1112 within 7 mm of the unit lead frame.
2. Connect a by-pass capacitor (30pF) between GND and Vout avoid loading effect.
3. Take proper electrostatic-discharge (ESD) precautions while handling these devices. These devices are sensitive to ESD.
